Seven Falls of Kawazu and Various Nature Activities

The Kawazu-zakura (cherry blossoms) have been well-known as the earliest-blooming cherry blossoms in outlying area of Tokyo. (Typically, cherry trees bloom in Tokyo between late March and early April.) Compare to the ordinal cherry trees in Tokyo, larger and brighter pink petals are the outstanding characteristics of Kawazu-zakura. There are 8,000 cherry trees in Kawazu. "The Kawazu-zakura Cherry Blossom Festival" is held during the blooming season and visited by a million of Japanese and foreign tourists.

It is very rare that 7 falls exist in the same area. Seven Falls have been attracting many foreign tourists as well as Japanese visitors. Also, "7" is considered as a lucky number in Japan, and that may be a reason of the visit by a number of Japanese. You can see all the Seven Falls within one and a half hours.
